

StemeXe for Integrated Apps

When you think engagement, think StemeXe

Challenges of Multiple Apps

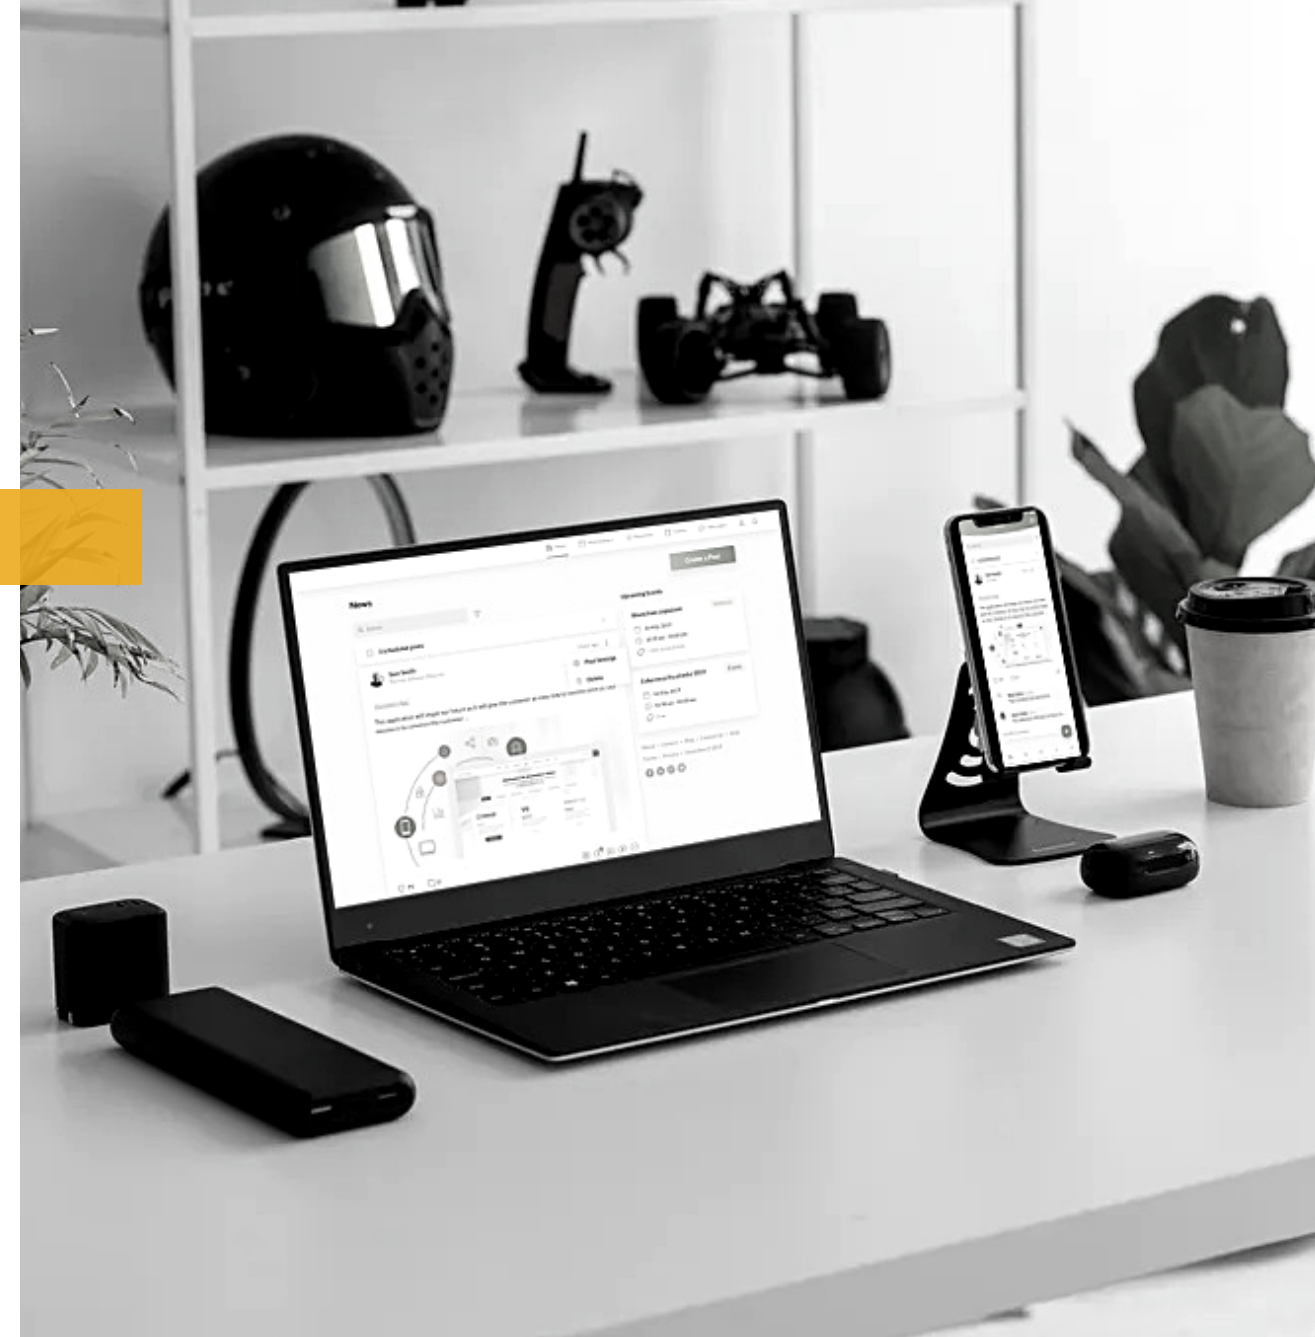

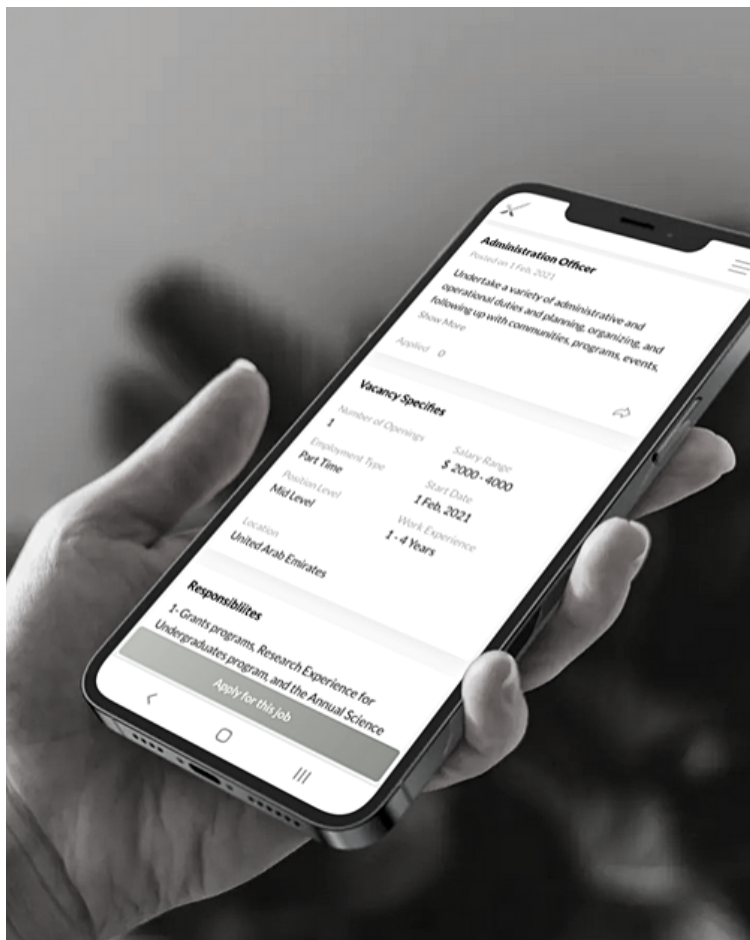

As organizations go digital, they face several challenges. Most of these challenges revolve around user adoption of systems because:

- Multiple systems means users are unsure where, and how, to access them;
- Managing inputs into multiple systems can be a hassle;
- Checking multiple apps and systems for notifications is frustrating.

Users end up neglecting these systems or struggling to use them.

The Solution: StemeXe for Integrated Apps

StemeXe for Integrated Apps

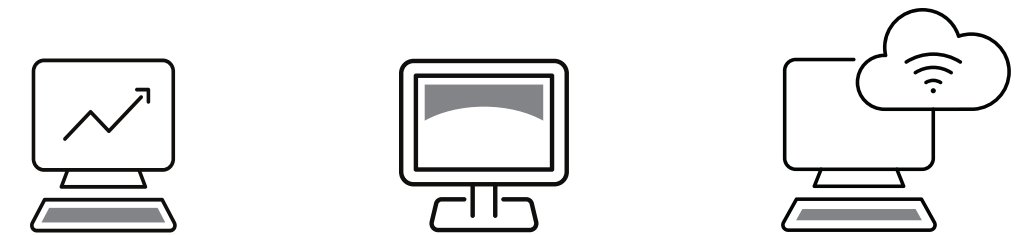

What is StemeXe for Integrated Apps?

StemeXe for Integrated Apps is the perfect solution for organizations using multiple digital systems.

StemeXe can bring together all of those systems under one neat, easy to use interface through mobile and web.

StemeXe for Integrated Apps fills the space between your applications and your users, allowing you to keep all of your current applications, but present a unified interface for users.

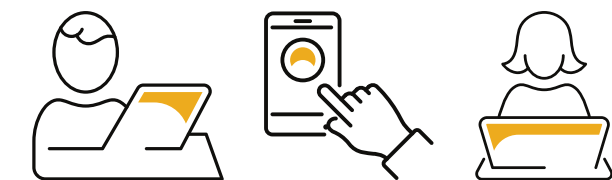

HOW DOES STEMEXE WORK?

Your organizational applications

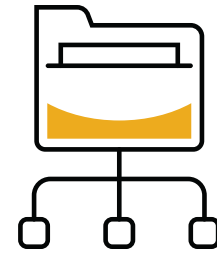

StemeXe

Your users

The StemeXe Journey

StemeXe products are designed to address the complete user journey to ensure that applications can not only connect, but that users will be engaged and encouraged to use it.

CONNECT

EDUCATE

ENGAGE

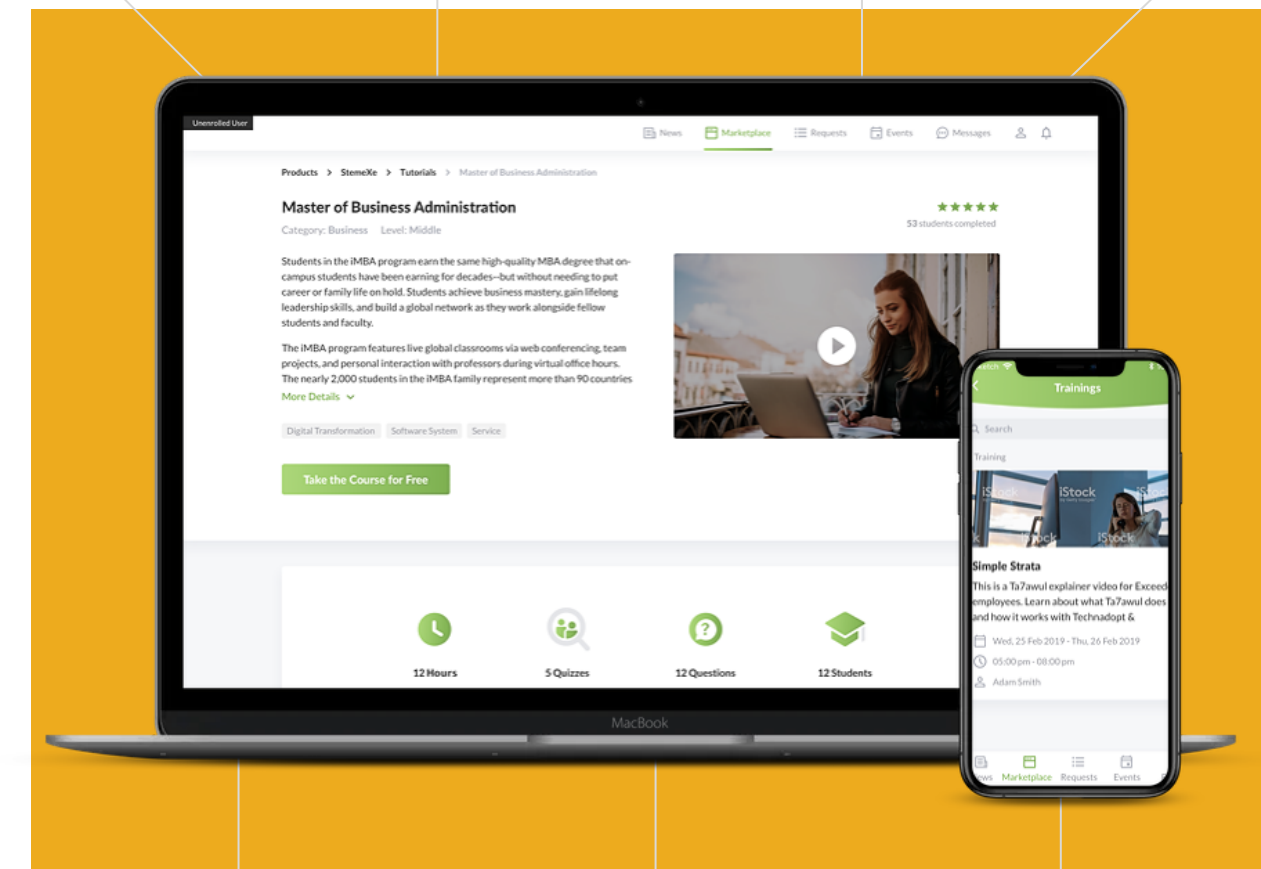

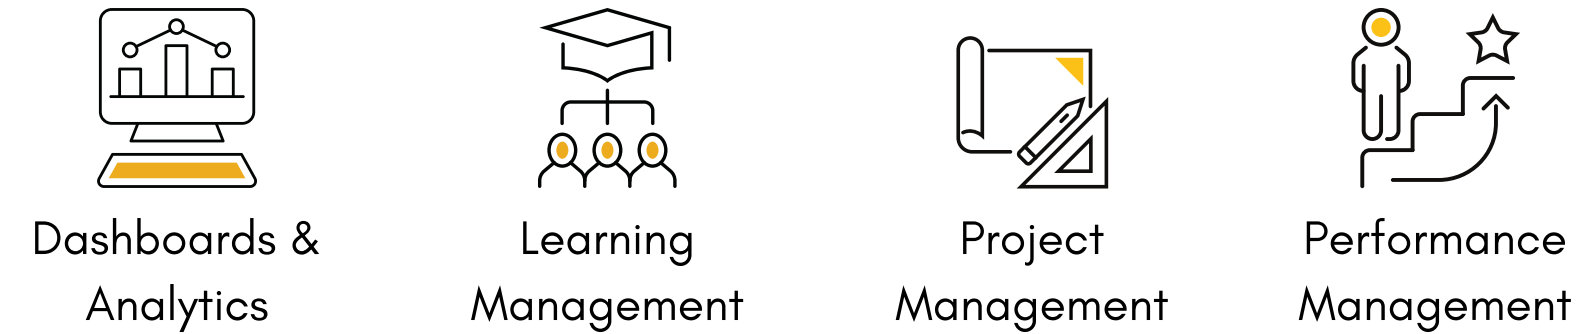

AUTOMATE

How StemeXe Connects

Besides its core features, StemeXe for Integrated Apps can connect with just about any backend application with an API to allow it to read from, and write to, organizational systems.

This includes systems built on SAP, Microsoft Dynamics, Oracle, etc.

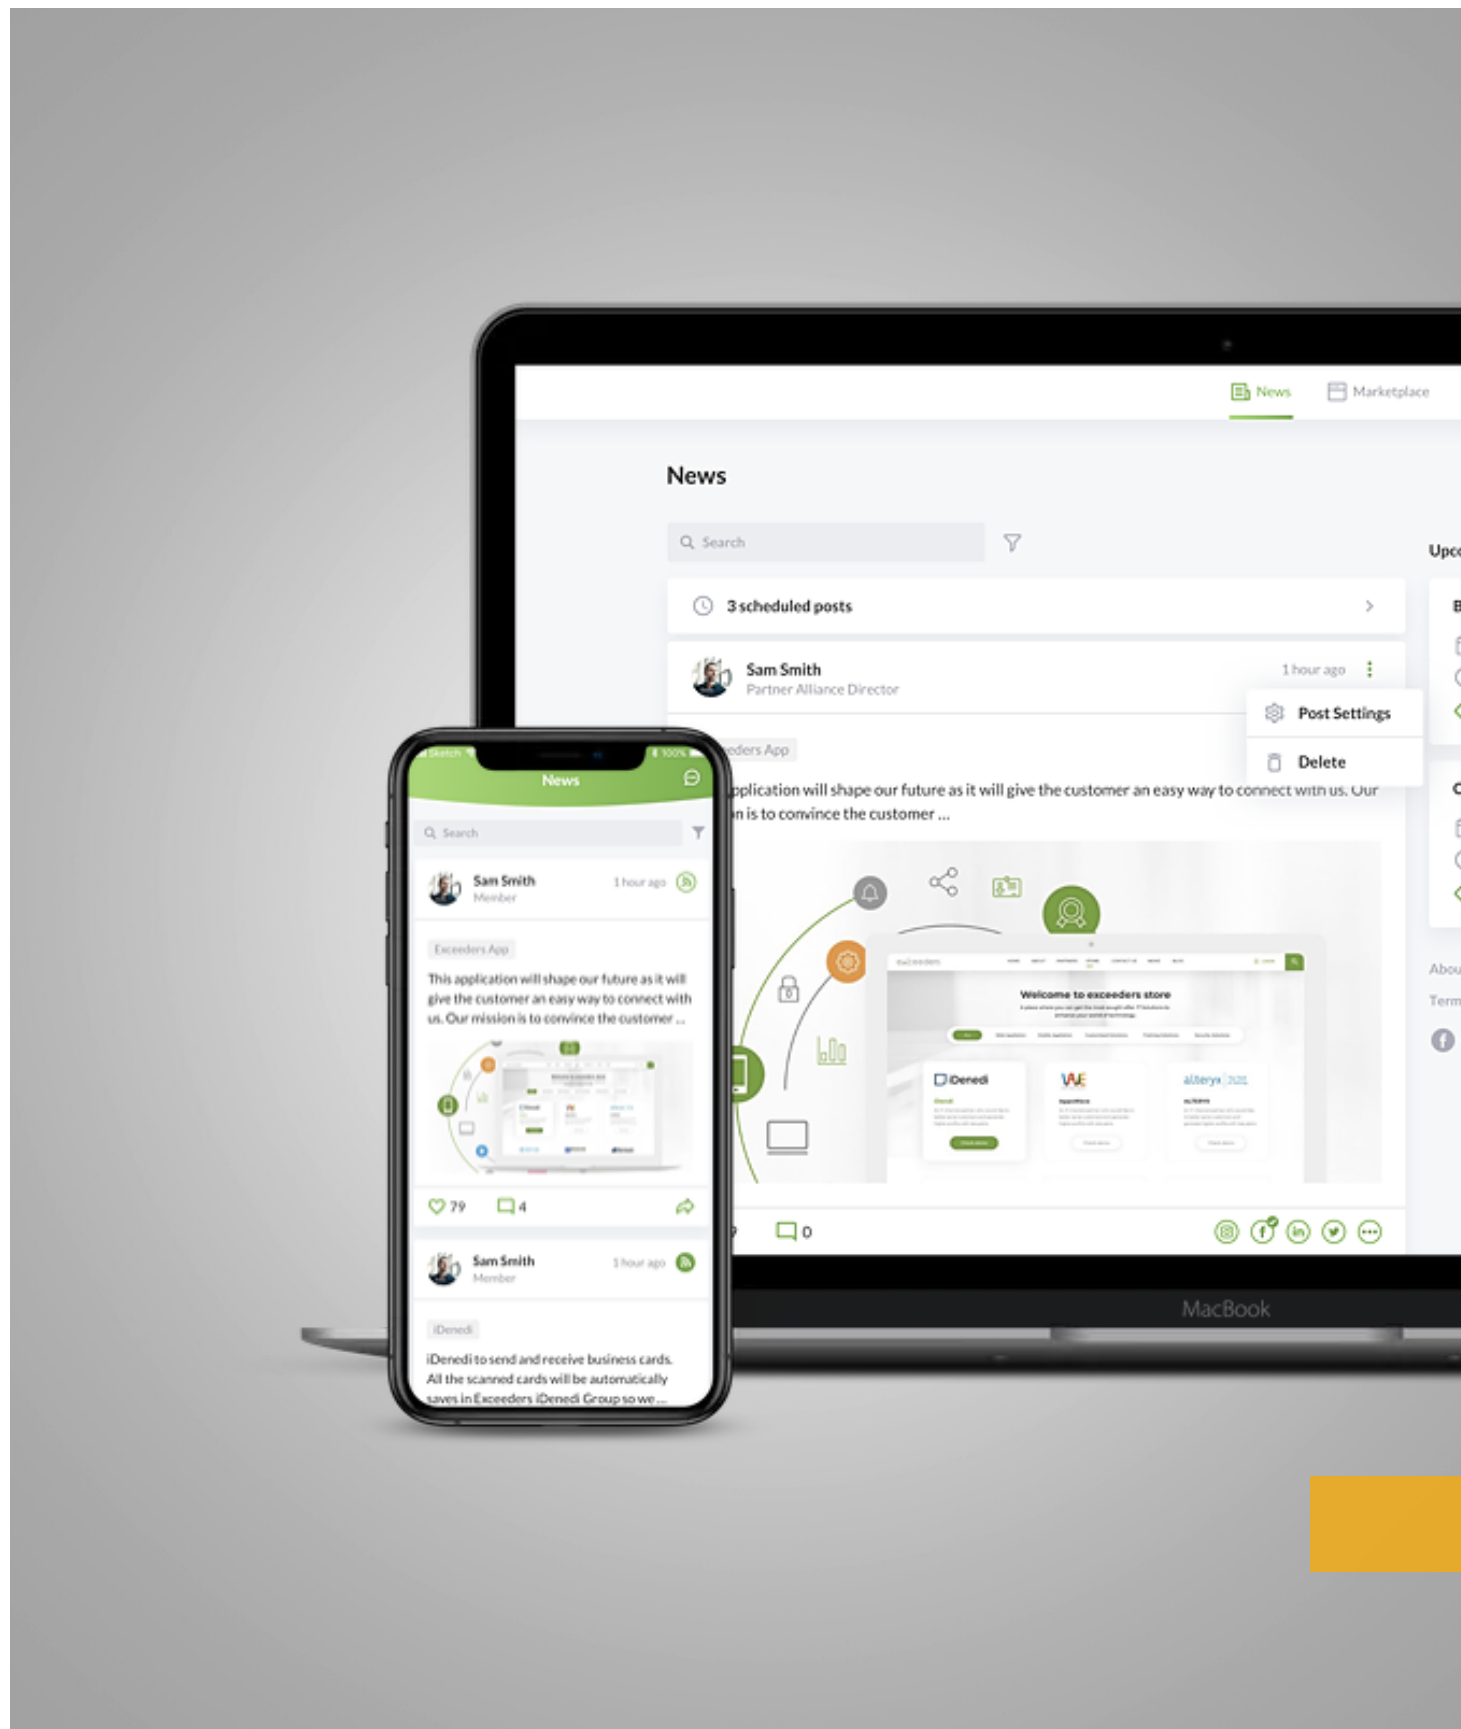

Other modules that can be plugged into StemeXe include Activity Management, Dashboards, Learning Management, and more.

How StemeXe Engages

StemeXe for Integrated Apps is designed with user engagement in mind. **Multi-channel engagement tools** guarantee that users will never lost or unsure.

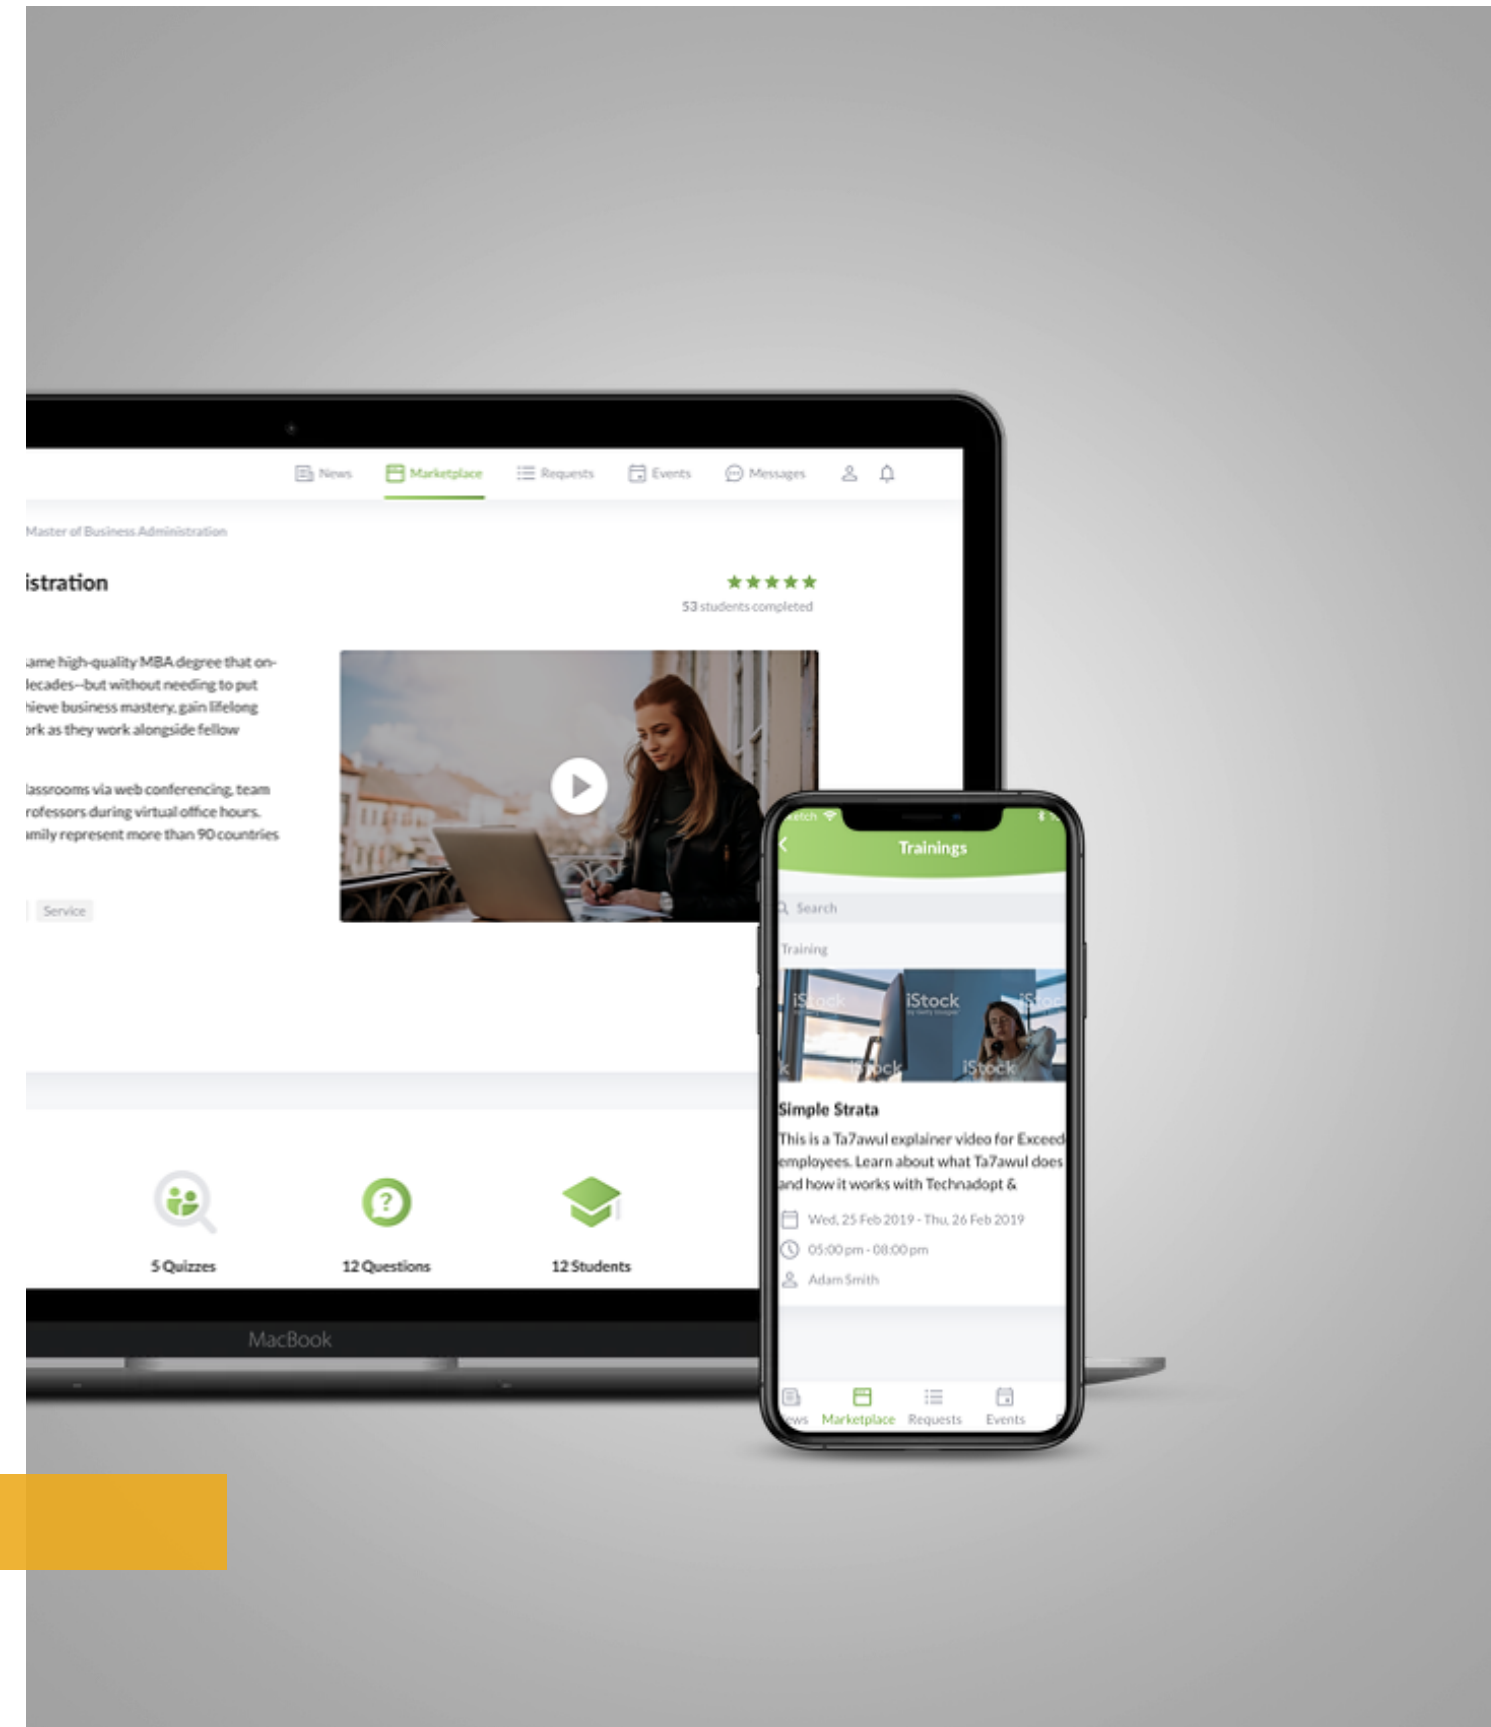

- Announcements
- Agent-led chat
- Integration with chatbots
- Events

How StemeXe Educates

StemeXe has multiple features to support customers in **educating end-users**. Whether you are educating about automation, processes, services, or the company itself, StemeXe provides the tools:

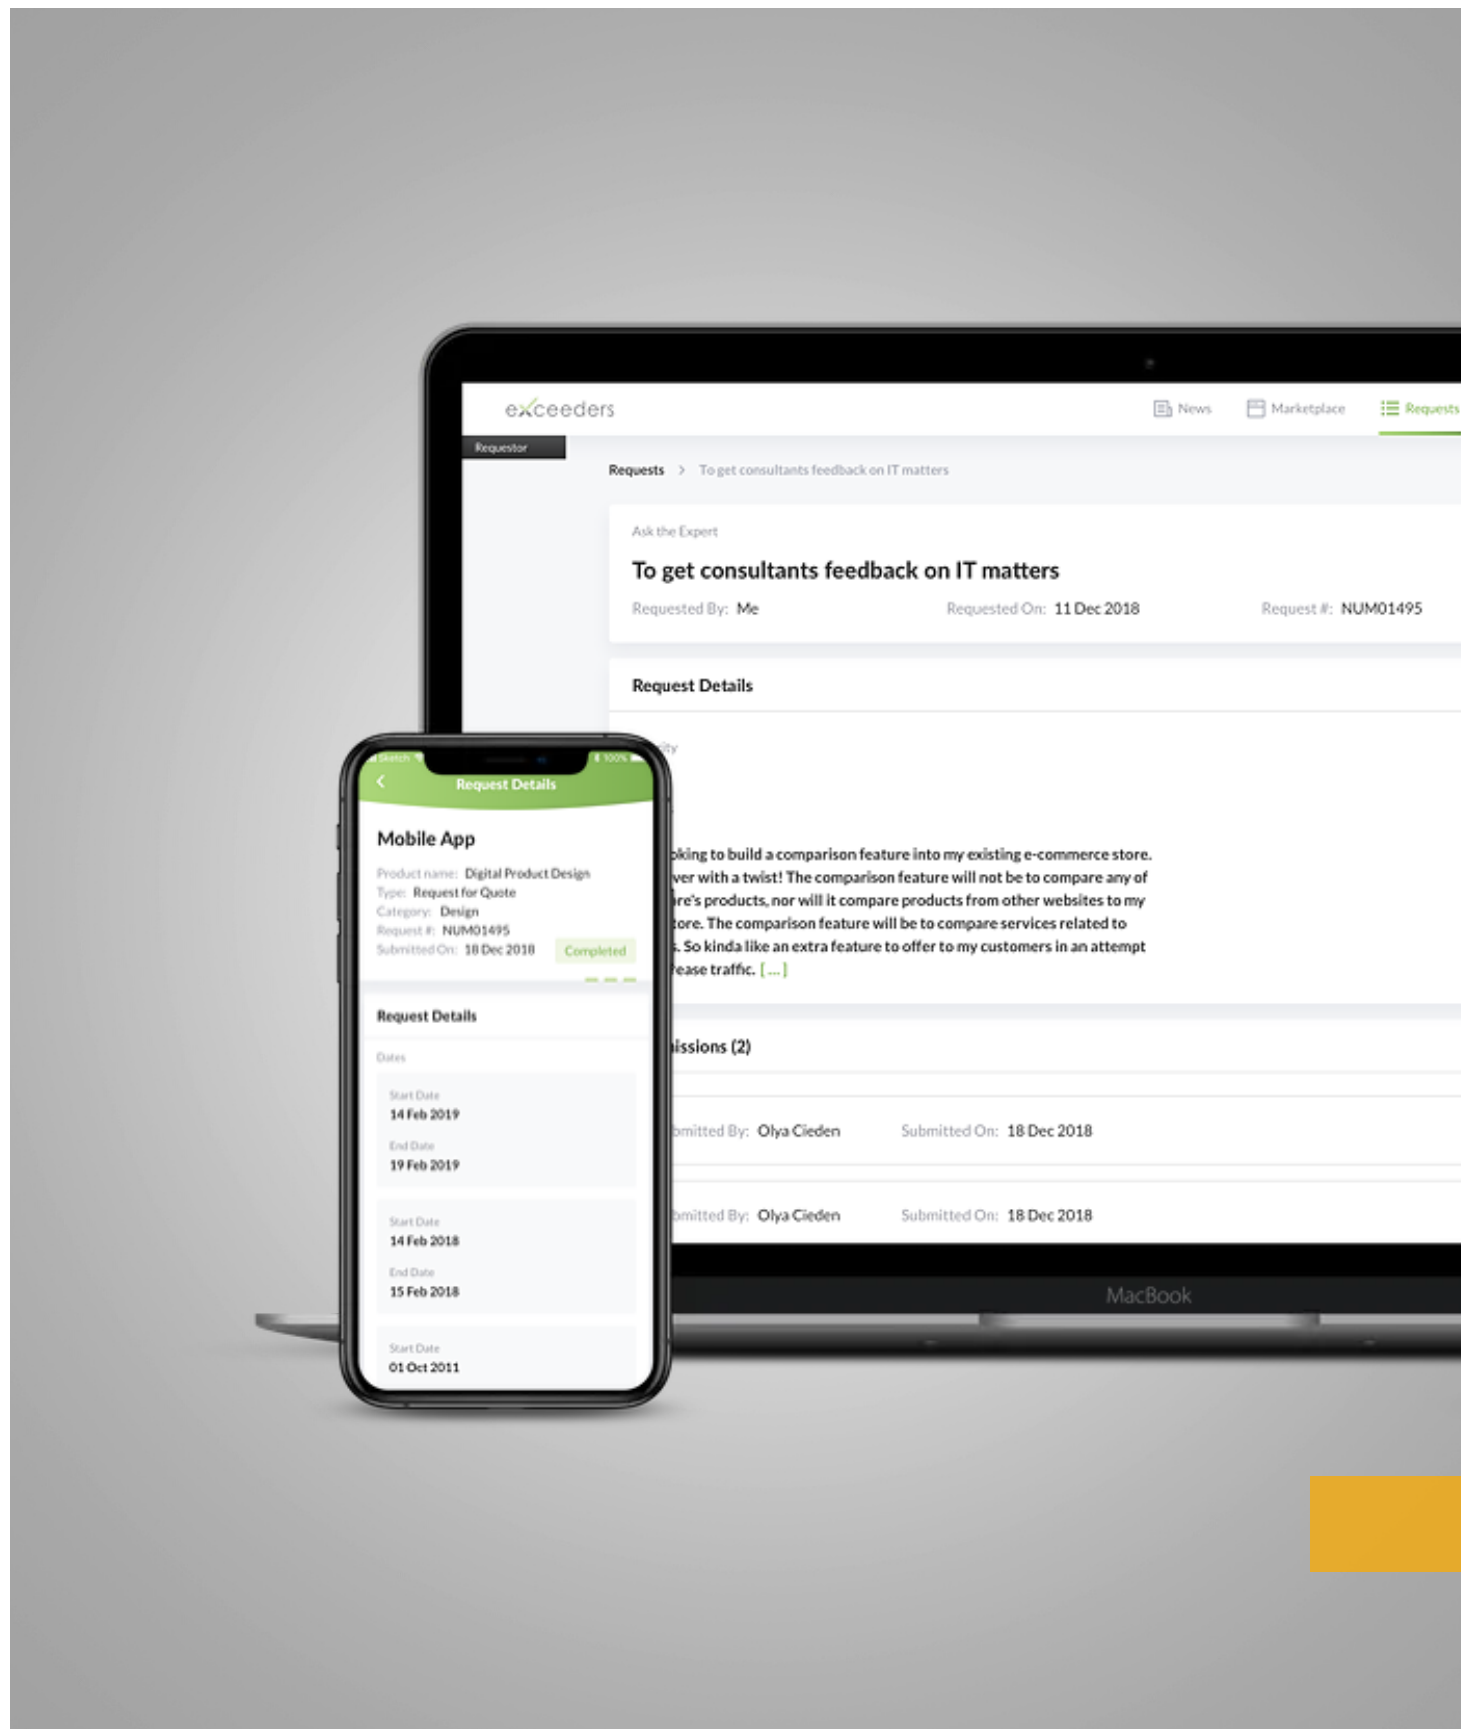

- Tutorials modules
- Quiz module
- Online training
- Product libraries

How StemeXe Automates

StemeXe's no-code, automation core allows customers to **automate processes and requests** in a matter of minutes.

Processes can be tracked by both requestors and admins and can be resolved on the go.

How We Are Different

Speed

StemeXe for Integrated Apps can be up and running in a matter of hours, where other systems with similar features take weeks of set-up and configuration.

Flexibility

StemeXe is completely customizable and flexible. Out of the box features can be configured within minutes, while integration with outside applications simply requires an API.

Cost

Because of the minimal effort and time required to set it up, StemeXe is the most cost effective solution. You only pay what you use, as you use it.

Since organizations across the region went into lock-down due to the COVID-19 pandemic, our **customers have needed to ensure employees had access to systems and were actually using them.** This has meant overhauling the way organizations make these systems accessible to employees.

StemeXe has been at the forefront of these efforts. To date StemeXe has been the integrator of hundreds of applications due to its amazing simple interface, speedy set-up, and the fact that it is one of the most cost-effectives integration solutions in the market.

Not only that, we are thrilled to announce that, to date, **over 1,000,000 requests have been automated and processed** on StemeXe!

100s of apps
integrated and
1,000,000 requests
processed...
